Mounting Instructions

C91 - C91/LUX - INOXSEA horn (connections with electric wires)

The horn must be fixed to a flat, rigid (possibly metallic) surface using the special bracket and screws supplied. The horn must be installed in a position protected from:

- sprays of water generated by the movement of the vehicle or by washing systems.
- foreign bodies such as stones, insects, mud, snow, etc.
- excessive heat sources (above 80°).

ATTENTION!

It is recommended to install the horn with the mouths slightly downwards in order to avoid the entry of foreign bodies (water, mud, insects, etc.). In the case of horizontal mounting of the horn, it is recommended to mount a special SPOILER.
