Mounting Instructions

PN/2P and 3P - ELECTROPNEUMATIC HORN

The compressor and the horns must be fixed to a flat, rigid surface (possibly metal) using the special brackets and screws supplied.

The horn must be installed in a position protected from:

- sprays of water generated by the movement of the vehicle or by washing systems.
- foreign bodies such as stones, insects, mud, snow, etc.
- excessive heat sources (above 80°) such as radiators, exhaust pipes, engines.

ATTENTION!

It's recommended to install the trumpets and the electrical connection of the compressor pointing downwards.
